

CARLISLE

For those who
live *beautifully*.

Photographer: Christopher Stark | Designer: Maria Khouri Design

The Art of *Layout*

Creating rhythm, drama, and architectural distinction.

For centuries, patterned floors have been used to define great interiors — from the grand halls of European estates to the refined residences of today. The layout of a floor is more than a surface treatment; it sets the tone for the entire room.

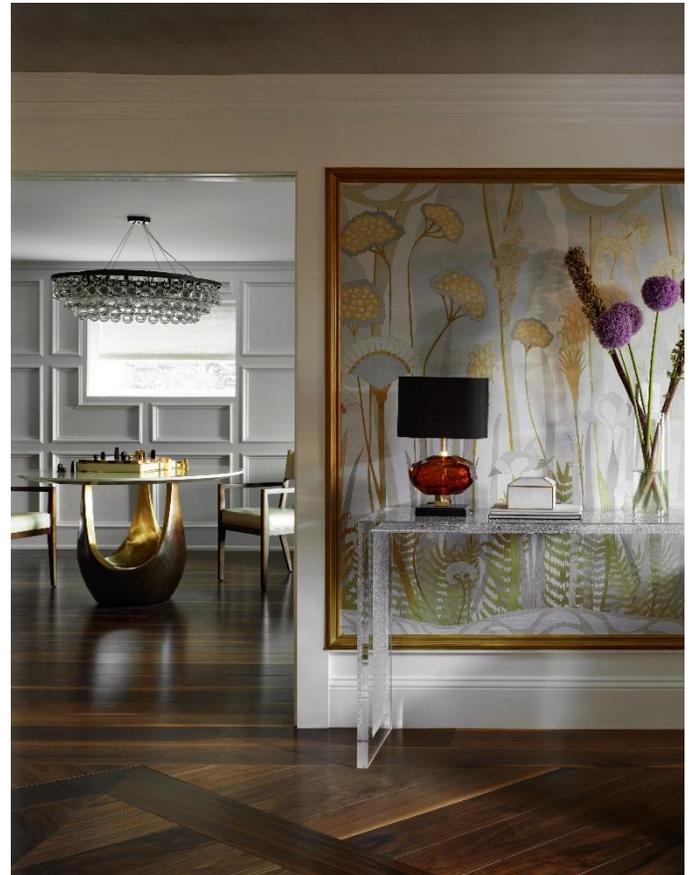

At Carlisle, wide plank is our signature, celebrated for its seamless flow and natural beauty. But when crafted into patterns, those same boards become an architectural statement — a way to introduce movement, geometry, and distinction underfoot. Chevron draws the eye with sharp, modern angles. Herringbone layers classic rhythm and energy. Versailles panels echo the artistry of historic palaces. Each layout brings its own personality, yet all share the hallmark of Carlisle craftsmanship: precision milling, dimensional perfection, and enduring beauty.

Whether chosen for timeless simplicity or dramatic impact, every plank and pattern becomes a canvas for personal expression — transformed by Carlisle into a floor that is truly one of a kind.

The Power of Pattern

The layout of a floor defines its character, introducing rhythm, movement, and architectural detail that transform a surface into a statement of design.

- **Plank** - The classic Carlisle choice - wide boards flowing seamlessly to showcase the natural beauty of the wood.
- **Chevron** - Angular precision creates movement and elegance, lending a refined, architectural rhythm to any space.
- **Herringbone** - A timeless pattern of offset geometry, bringing texture, energy, and sophistication to the floor plane.
- **Versailles** - An iconic design of interwoven panels, adding historic grandeur and dramatic artistry to interiors.
- **Custom Patterns** - From parquet to bespoke inlays, Carlisle can bring any vision to life with meticulous craftsmanship.

The Carlisle Difference

- **Precision Milling** – Every board, plank or pattern, is dimensionally exact for seamless installation and precise alignment.
- **Curated or Custom** – Choose Chevron or Herringbone from Curated, or explore endless layouts with Carlisle Custom.
- **Artistry & Scale** – Wide-plank construction enhances both plank and pattern, amplifying design impact in ways narrow floors cannot.

Carlisle. Where every layout becomes a work of art.
